

Summer Global Internship Program in Hong Kong, China

Yaoqing Wang

Logistics & Marketing Major

STEP Signature Project

Project Description

It was a great opportunity to work in Hong Kong for 8 weeks and doing an internship job that is closely related to my major. The company I worked for was Polar Air Cargo Worldwide, and it provides air cargo service between United States and Asia. It was my first internship experience and I was glad to be given the chance to work with a group of passionate and nice people who are willing to teach me and trust me on lots of tasks. Before doing this internship, logistics and marketing were just words and definitions that appears on my exams and assignments. However, this internship gave me the experience to get real life exposure to these two industries and see how air cargo companies operates every day. It was very meaningful and unforgettable.

Personal Impact

I have improved my interpersonal skills and professional networking skills after this internship experience. I was also taking an online law course while doing this internship, so I have developed my time management and task management skills during this summer. I have also learned some Cantonese during this summer.

Favorite Part of Experience

My favorite part of this experience was spending spare time with other students who also participated in this program. We would gather together on every Friday night and share our experiences and feelings about work, and we also tried several authentic restaurants. This trip was a great opportunity to make friends.
